**FEDERICO GINER**, una marca ligada a la historia de la educación en España en los últimos cien años, se ha convertido en todo un referente en el sector de la educación, tanto a nivel nacional como internacional, ya que ha sabido reinventarse para hacer frente a las demandas y necesidades de un mundo cada vez más cambiante. Y es que, la flexibilidad en el diseño, la producción y el testeo de sus productos, han hecho de FEDERICO GINER una marca que se ha convertido en sinónimo de máxima calidad y trabajo bien hecho.

**FEDERICO GINER**, a brand linked to the history of education in Spain in the last hundred years, has become a benchmark in the education sector, both nationally and internationally, and to which has managed to reinvent itself to cope to the demands and needs of an increasingly changing world. And is that, the flexibility in design, production and the testing of their products, have made FEDERICO GINER a brand that has become synonymous with top quality and work well done.

1910

**Federico Giner** pone en marcha el primer taller de carpintería de Tavernes de la Valldigna (Valencia), el embrión de un negocio de base industrial que actualmente es todo un referente en el sector de la fabricación de mobiliario escolar e instalaciones. Sus productos siempre se han definido por su calidad, perdurabilidad y funcionalidad.

**Federico Giner** established the first carpenter workshop in Tavernes de la Valldigna (Valencia), the birth of an industrial based business which is nowadays a benchmark in the manufacturing sector for school furniture and fixtures. Their products are renowned for their quality durability and functionality.

1975

**Llega la homologación escolar**  
*The school endorsement arrives*

El Ministerio de Educación crea una nueva normalización en la fabricación del mobiliario escolar que la empresa aborda de manera inmediata. Al mismo tiempo, consolida su presencia internacional a través de ferias y certámenes por todo el mundo.

*The Ministry of Education introduces new regulations to school furniture production which the company immediately adopts. At the same time the company's international presence is consolidated by participating in international fairs and tenders.*

1992

**Colaboración con Institutos Tecnológicos**  
*Collaboration with technological institutions*

Se inicia una estrecha relación con AIDIMA e IBV de Valencia, con el objetivo de no cesar en la investigación y desarrollo en el mobiliario escolar. En estos años, se amplía la oferta con el mueble para Universidad y la fabricación de carros portaequipajes en aeropuertos.

*A close line of communication is formed with Valencia AIDIMA and IBV with the aim of continuous research and development of school furniture. During this period the range of products is expanded to include university furniture and airport trolleys.*

1926

**Especialización por el mobiliario escolar**  
*Specializing in school furniture*

Comienza la participación de Federico Giner en las convocatorias de concursos para suministro de muebles escolares del Ministerio de Educación, un hecho que marcará la especialización de la firma y su trayectoria.

Federico Giner starts tendering for school furniture contracts with the Ministry of Education, an event which marks the beginning of specialization in the company and its industrial projection.

1989

**El nacimiento de un parque empresarial**  
*The birth of a business park*

Con el crecimiento de la empresa, se construyen nuevas instalaciones y se crea una red de empresas auxiliares que configuran un tejido industrial alrededor de la firma. Esta se apoya en la colaboración de diseñadores externos que aportan un toque de frescura al mobiliario de hogar y educativo.

*With the growth of the company, new installations are constructed and an auxiliary network of companies is created, which forms an industrial web around the company. This is supported by the collaboration of external designers who bring a fresh approach to school and household furniture design.*

2023

**Un nuevo enfoque**  
*A new approach*

Federico Giner apuesta por la innovación y la internacionalización. Lanzamiento de nuevo catálogo, fruto de constantes inversiones durante los últimos 5 años en colaboración con prestigiosos diseñadores. El objetivo de los próximos años es estar presente en ferias internacionales y seguir innovando con el fin de dar a conocer los valores y atributos de los productos FG fuera de nuestras fronteras.

*Federico Giner is committed to innovation and internationalization. Launch of a new catalog, the result of constant investments over the past 5 years in collaboration with prestigious designers. The objective of the coming years is to be present at international fairs and to continue innovating in order to the values and attributes of FG products outside our borders.*

## Calidad Federico Giner

Una inversión en productos FG, es una inversión en calidad que ha sido probada a lo largo de los años y que es respaldada con garantías comprobadas.

Factores a tomar en cuenta:

- Funcionalidad del producto en relación a la necesidad a cubrir.
- Medidas adecuadas al usuario según normativa.
- Acabados y materiales para uso intensivo en espacio públicos.
- Mantenimientos y garantía de reposición.

An investment in FG products, is an investment in quality that has been proven over the years and is backed with proven warranties.

Factors to take into account:

- Functionality of the product in relation to the need to be covered.
- Adequate measures to the user according to regulations.
- Finishes and materials for intensive use in public spaces.
- Maintenance and replacement guarantee.

# Aula del futuro

Future classroom lab.

PROVEEDOR OFICIAL  
aula del futuro

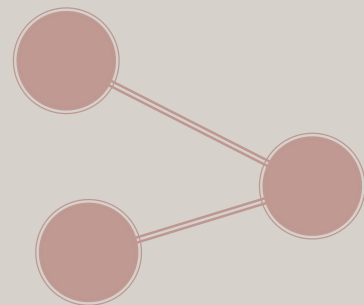

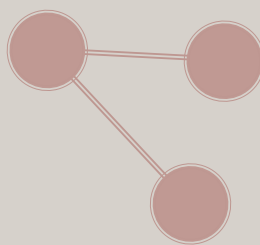

El aula del futuro se concibe como un espacio creativo donde el alumnado encuentra todo aquello que necesita para experimentar múltiples y diversas experiencias de aprendizaje. Contempla aulas muy versátiles, espacios abiertos, multifuncionales y con mobiliario modular móvil que permita la creación de diversas zonas. Las zonas de aprendizaje de un espacio creativo no han de ser concebidas de forma rígida, sino flexible y adaptable a cada necesidad. En muchos casos no siempre están presentes todas las zonas de forma individual, sino que pueden solaparse unas con otras en función de los medios y la necesidad, lo mismo que para los diferentes elementos tecnológicos. A continuación, se definen las zonas de aprendizaje establecidas en el modelo del aula del futuro.

**Interacción:** Equipada con una pizarra interactiva, esta zona ilustra cómo utilizar la tecnología en un aula tradicional para fomentar la interacción y la participación de los alumnos. Proporciona la oportunidad de experimentar formas de enseñanza y un aprendizaje más interactivo dentro de un entorno tradicional con la ayuda de hardware, software y contenidos específicos.

**Future classroom lab**, is conceived as a creative space where students find everything they need to experience multiple and diverse learning experiences. It envisions highly versatile classrooms, open spaces, multifunctional and with mobile modular furniture that allows the creation of different zones. The learning areas of a creative space should not be conceived in a rigid way, but flexible and adaptable to every need. In many cases, not all zones are always present individually, but can overlap with each other depending on the means and the need, as well as for the different technological elements. The following defines the learning zones established in the model of the classroom of the future.

**Interaction:** Equipped with an interactive whiteboard, this area illustrates how technology can be used in a traditional classroom to encourage student interaction and participation. It provides the opportunity to experience ways of teaching and more interactive learning within a traditional environment with the help of specific hardware, software and content.

**Intercambio:** Un área particularmente diseñada para desarrollar trabajo en pequeños grupos con la supervisión del profesor. Es ideal para desarrollar trabajos colaborativos y apoyar escenarios de aprendizaje basados en proyectos, fomentando los equipos de trabajo y las habilidades para la dirección de proyectos específicos.

**Exchange:** An area particularly designed to develop work in small groups with teacher supervision. It is ideal for developing collaborative work and supporting project-based learning scenarios, fostering teamwork and project management skills.

**Presentación:** Un área para que el profesorado y el alumnado lleven a cabo las presentaciones de sus trabajos, sus investigaciones, etc. Dispone de una pizarra digital y bancos en gradas, lo que permite a todas las personas participantes verse entre sí, como en un foro, y favorece la participación y la discusión.

**Presentation:** An area for teachers and students to carry out presentations of their work, research, etc. It has a digital whiteboard and benches on bleachers, which allows all participants to see each other, as in a forum, and encourages participation and discussion.

**Desarrolla:** Una zona tranquila donde los alumnos acceden a distintos recursos, realizan investigaciones, trabajan individualmente y aprenden de modo informal. Esta zona se puede usar para desdibujar los límites entre el aprendizaje en casa y en la escuela y, entre otras actividades, se pueden realizar manualidades, ver videos, o experimentar con aplicaciones de software.

**Develop:** A quiet area where students access resources, conduct research, work individually and learn informally. This area can be used to blur the boundaries between learning at home and at school and, among other activities, students can do crafts, watch videos, or experiment with software applications.

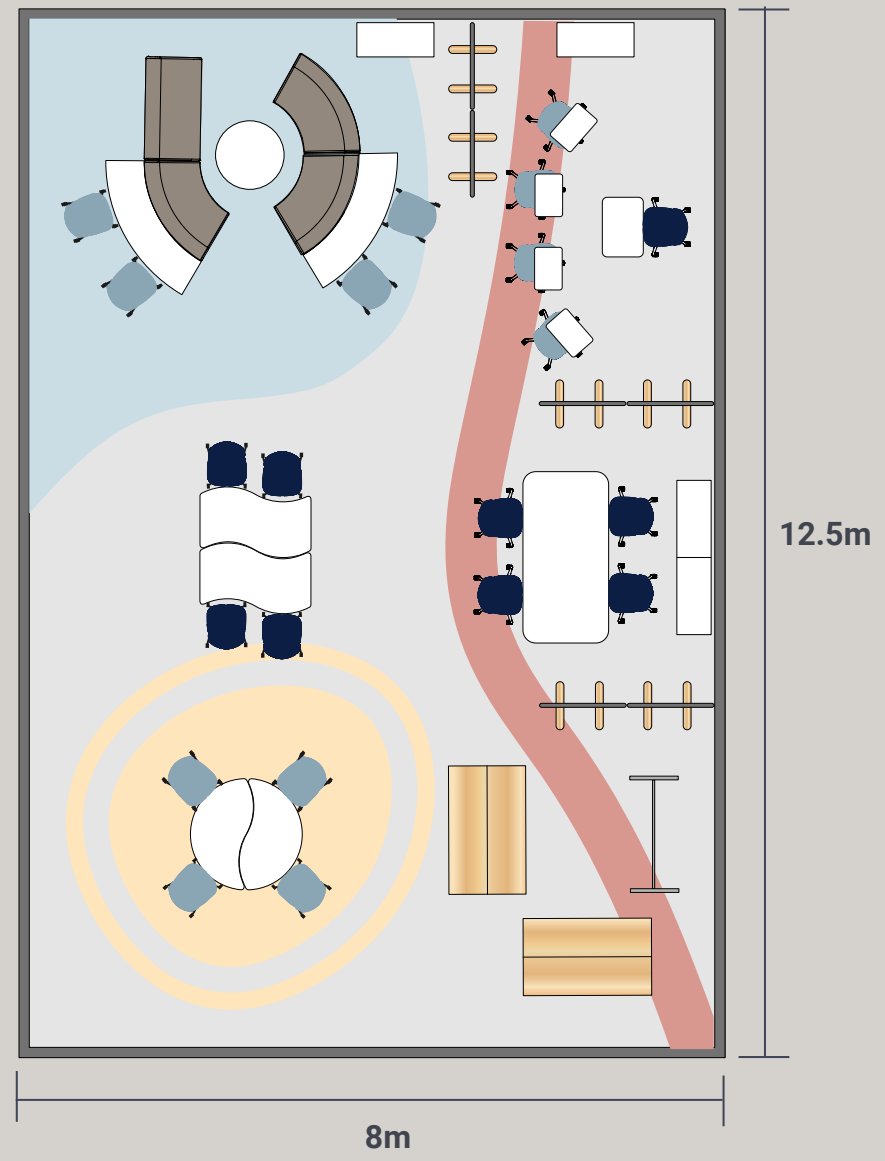

**Investigación:** Una zona flexible para el trabajo en grupo, el desarrollo de proyectos y actividades prácticas. Este espacio es idóneo para trabajar con los compañeros, explorar, investigar pequeños objetos usando los ordenadores portátiles y los microscopios, desarrollar habilidades para la resolución de problemas o la programación con robots.

**Research:** A flexible area for group work, project development and hands-on activities. This space is ideal for working with peers, exploring, investigating small objects using laptops and microscopes, developing problem-solving skills or programming with robots.

## GUÍA DE TALLAS

\*Independientemente de las medidas de esta guía, cada producto tiene sus medidas específicas en su ficha comercial informativa. \*Todas las medidas se consideran en mm.

SEGÚN LA NORMATIVA UNE-EN 1729 SILLAS Y MESAS PARA CENTROS DE ENSEÑANZA.

### Normativa.

En **FEDERICO GINER** nos tomamos muy en serio la seguridad de nuestros diseños. Por eso, seguimos la norma **española y europea UNE-EN 1729** para centros de enseñanza, donde se regulan las dimensiones funcionales y los requisitos de seguridad del mobiliario escolar, en su primera y segunda parte.

Esta normativa codifica cada talla con un color y un número. Las tallas 0 y 1 son claramente tallas para centros infantiles de primera etapa (*escuelas infantiles*). El resto de tallas son las que se usan para el resto de etapas educativas.

Las medidas más importantes para determinar las tallas, son la altura total de los alumnos y el rango poplíteo. Estos se han determinado en base a estudios antropométricos y ergonómicos, siendo las medidas marcadas en la norma las más adecuadas para la adopción de una buena postura del alumno, y su menor fatiga durante el uso.

						
	<b>TALLA 1</b>	<b>TALLA 2</b>	<b>TALLA 3</b>	<b>TALLA 4</b>	<b>TALLA 5</b>	<b>TALLA 6</b>
Orientativo	INFANTIL	INFANTIL	PRIMARIA 1º-2º	PRIMARIA 3º-4º	PRIMARIA 5º-6º	SECUNDARIA
