## Maintenance

- Check the condition of the metal structure.
- Check the condition of the shell.
- Ensure there are no cracks or dangerous breakages.

## Cleaning

- Cleaning of the metal structure: denatured alcohol may be used only in extreme cases. Never use solvents.
- Dust removal: use a dry cloth or brush. Clean with a sponge or cloth and neutral soap, or a mixture of water and vinegar. For embedded dirt, grease, or stains, ammonia may be used.
