

# Dida Classic Chair

SAC500

Made in Spain

6 ud/box

## Description

Versatile and active-collaborative learning school chair. Designed for use in classrooms, dining rooms, libraries, offices, and cafeterias. Available in sizes 3, 4, 5, and 6.

## Components

Shell:

- Polypropylene + 15% GF.
- Manufactured in an injection mold.

Metal structure:

- Ø22x1.5mm steel tube. Structure welded using oxyacetylene arc welding in an inert atmosphere. Epoxy paint. Minimum 50µm.

## Main Features

- Robust.
- Easy to clean.
- Lightweight and stackable up to 7 units.
- Option: upholstered seat in sizes 5 and 6.
- Ergonomic shell.
- Rounded seat edge and lumbar shape on the bottom of the backrest.
- Slightly flexible backrest.
- Opening in the backrest for better ventilation.
- Integrated handle in the chair design.
- Reinforced at the bottom of the backrest.
- Specifically designed to adopt multiple sitting positions. Front, side, and reverse (straddling) without any obstruction for the user.
- Backrest extension for arm support in the side and reverse sitting positions.
- Textured anti-slip shell.
- Certified according to UNE EN 1729-1:2016 and UNE-EN 1729-2:2012+A1:2016 standards.

## Maintenance

- Check the condition of the metal structure.
- Check the condition of the shell.
- Ensure there are no cracks or dangerous breaks.

## Cleaning

- Cleaning the metal structure: Only use rubbing alcohol in extreme cases. Never use solvent.
- Remove dust with a dry cloth or brush. Wash with a sponge or cloth using neutral soap or a mixture of water and vinegar. For ingrained dirt, grease residues, or stains, ammonia can be used.
