Components

Top:
- Premium top: Board with HPL (high-pressure laminate) surface on both sides, with a birch plywood core, 20mm thick.
- Premium “M” top: Particleboard core, both sides with HPL (high-pressure laminate) and edges covered with solid beech wood, later lacquered.
- Basic top: Double-sided particleboard laminated with decorative melamine paper and resistant melamine resins, 25mm thick. Edges are covered all around with 2mm PVC edging (black), industrially glued.

Legs:
- Metal leg: Steel tube Ø50x1.5mm. Epoxy paint finish. Caster or leveler option.
- Wooden leg: Solid beech wood, lacquered. Leveler only.
Footrest: Stainless steel tube Ø30x2mm.

Base and footrest bracket:
-Injected aluminum.

Main Features

- Sturdy.
- Modular.
- Top suitable for intensive use in public spaces (Premium version).
- Detachable. Supplied disassembled.
- Fixed leg.
- Robust leg-to-top connection system. Reinforced design made from a single piece of injected aluminum. Fully rounded to prevent pinching or damage to users and clothing. Side connection with two M6 screws on the leg and perpendicular connection to the top with six wood screws.

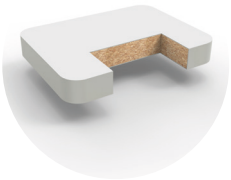

Maintenance

- Check the condition and tightness of all connection fittings.
- Inspect the condition of welds in the metal structure.

Cleaning

- Cleaning the top: solvent may be used only in the most extreme cases.
- Cleaning the metal structure: methylated spirits may be used only in the most extreme cases. Never use solvent.
